Electronics — April 2004
By Ben Ellison

Caig DeoxIT and ProtecIT

DeoxIT Power Booster is specifically designed to remove oxidation on metal electrical connectors by a process of chemical action and reaction. It worked impressively in testing, even fixing pesky contact problems that seemed immune to more familiar spray cleaners. DeoxIT is also said to provide sealing and lubrication, but Caig Laboratories has mixed a specific ProtecIT product for that purpose as well, along with many other useful-sounding potions. All come in numerous sizes and application styles, with the mini sprays shown starting at \$8.

Caig Laboratories Phone: (800) 224-4123. www.caig.com.
